1. Purpose

The purpose of this policy is to provide a framework for the design, development, review and approval of courses within the Australian School of Accounting (ASA) in order to ensure:

- best practice in curriculum design, delivery of teaching and learning, assessment, and the provision of Work Integrated Learning (WIL) activities.
- that the qualifications ASA awards are designed to meet the standards for the AQF level they purport to meet.

2. Scope

This policy applies to all courses developed and delivered at ASA and to all staff, directors, officers, external appointees on any ASA board or committee, volunteers, and contractors.

3. Principles

The core principles of this policy and the related procedure are based on the following:

 Courses are designed to enable students to achieve course learning outcomes and graduate attributes of ASA.

- Courses are designed to enrich employment opportunities for graduates.
- Courses are designed to include a range of content that include updated pedagogies and assessment strategies.
- Courses are designed to meet and exceed regulatory requirements of the regulatory bodies and standards of the Higher Education Threshold Standards and the Australian Qualifications Framework (AQF).
- Submission of course accreditation and re-accreditation applications by registered
 providers, the Tertiary Education Quality and Standards Agency (TEQSA) apply the Core
 Plus model to assess the application. Provider's compliance with a set of core standards,
 relating principally to governance, internal quality assurance, student performance and
 student experience will be the focus of this assessment. The core standards will be: [...]
 - 3. For new course accreditation for existing providers, TEQSA has selected the core Standards on the basis of that:
 - a. the provider is established and TEQSA has already undertaken a comprehensive assessment the provider' governance arrangements and internal quality assurance processes; and
 - b. the focus is on ensuring that the content and learning activities of the new course are consistent with the level of study and expected learning outcomes.
 - 4. For renewal of course accreditation, TEQSA has selected the core Standards the basis of:
 - a. TEQSA has already undertaken a comprehensive assessment of the accredited course against the relevant standard in the HES Framework; and
 - b. the focus at this stage of the assessment cycle for the course is on ensuring that the provider's monitoring, review and improvement processes have been effective, including the extent and robustness of independent review by a subject matter expert, and the nature of the provider's response to expert findings and recommendations i.e. consideration of the review report and, where appropriate, action taken. [...]
- Evaluation which involves external referencing and external/internal benchmarking, student and staff feedback, data analysis of progression, retention, attrition, and completion rates.
- Reflection on best teaching and learning practices.
- Process which involves an ASA-wide quality assured process with constructive alignment of learning outcomes, assessments, and student learning experiences.
- Consists of a systematic and cyclic approach to review, delivery and evaluation of courses and units.
- The process is supported by collaborative team working processes and engages a range of internal and external specialist knowledge.
- Courses are designed, where relevant, to include Work Integrated Learning with authentic partnerships with the field or industry.

4. Definitions

Term	Definition		
Academic Quality	A framework that provides principles and processes directed to ensure		
Assurance	that academic quality aligns with the overall strategic planning and policy of ASA.		
assessment	An item of academic work aligned with defined learning outcomes which		
	enables students to demonstrate academic achievement, proficiency, and		
	capacity.		
Australian	The Australian Qualifications Framework (AQF) is the national policy for		
Qualifications	regulated qualifications in Australian education and training. It		
Framework (AQF)	incorporates the qualifications from each education and training sector		
Trainework (Agr)	into a single comprehensive national qualifications framework.		
benchmarking	The process for comparing practices, processes or performance outcomes		
berrommarking	between ASA and other higher education providers. Its purpose is to		
	identify comparative strengths and weaknesses, as a basis for developing		
	improvements in academic quality or performance. Benchmarking can also		
	be defined as a quality process used to evaluate performance by comparing		
	institutional practices with identified good practices across the sector.		
Chief Executive Officer	The Chief Executive Officer is the highest organisational role for ASA and		
(CEO)	performs the role of Principal as well as their other duties.		
corequisite	A corequisite is a unit or other requirement that a student must		
corequisite	satisfactorily complete simultaneously during the same study period in a		
	given course.		
course design	The content, duration, and sequencing of the elements (units) of a course		
course design	of study.		
development	The design and creation of new courses and units.		
graduate attributes	Are generic learning outcomes that refer to transferable, non-discipline		
	specific skills that a graduate may achieve through learning that have		
	application in study, work and life contexts.		
Higher Education	The Higher Education Standards Framework (HESF) is the foundation for		
Standards Framework	regulating higher education providers and courses by the Tertiary		
(HESF)	Education Quality and Standards Agency (TEQSA).		
learning outcomes	What students are expected to know, understand and be able to		
	demonstrate on completion of a unit or course.		
microcredentials	Is a discrete learning package with appropriately articulated learning		
	outcomes and constructively aligned learning and teaching, and		
	assessment strategies		
National Code of	The National Code is a legislative instrument made under the Education		
Practice for Providers	Services for Overseas Students Act 2000 (ESOS Act) and sets nationally		
of Education and	consistent standards to support providers to deliver quality education and		
Training to Overseas	training to overseas students.		
Students 2018			
prerequisite	A prerequisite is a unit or other requirement that a student must		
	satisfactorily complete prior to the start of a given unit.		
review	The formal evaluation and assessment of an existing unit/s or course		
	taking into consideration feedback from stakeholders including employers,		
	staff and students, internal committees, and external reviewers, which is		
	informed by cohort analysis, academic data, benchmarking and		
	contemporary knowledge regarding unit/course matter, pedagogies, and		
	assessment strategies.		
short courses	Are programs other than accredited higher education awards or		
	microcredentials that are undertaken by an individual to improve or		
	support progress towards work, career and/or personal goals.		

Term	Definition
Tertiary Education	The Tertiary Education Quality and Standards Agency is responsible for
Quality Standards	regulating and assuring the quality of all providers of higher education in
Agency (TEQSA)	Australia.
work integrated	Encompasses any arrangement where students undertake learning in a
learning	workplace outside of ASA as part of their course of study.

5. Policy Details

5.1 Course Design and Development

ASA is committed to the design and development of high-quality courses that enable students to develop and demonstrate attainment of the ASA's Graduate Attributes. Teaching and learning will reflect best-practice in pedagogy for the field.

ASA qualifications will only be awarded when students have met all academic requirements which assures that students meet the standards for the AQF level. Each ASA Graduate will be ready to commence careers in their field with appropriate knowledge and skills that make them eminently employable.

5.2 Course Review

ASA is committed to the continuous improvement and updating of each unit to improve the academic quality of courses and the student learning experience.

ASA values feedback in its continuous improvement processes and seeks feedback from internal and external stakeholders.

ASA will review the performance of the courses and units on an ongoing and annual basis. This review will be based on the data collected from the course and teacher evaluation surveys as approved by the Academic Board and other evaluative mechanisms as recommended by the Learning and Teaching Committee.

Comprehensive course reviews will be conducted within three (3) years of initial accreditation, and thereafter every five (5) years. The review should include:

- the design and content of each course of study,
- the expected learning outcomes,
- the methods for assessment of those outcomes,
- the extent of students' achievement of learning outcomes,
- emerging developments in the field of education,
- modes of delivery,
- the changing needs of students,
- identified risks to the quality of the course of study, and
- include external referencing or other benchmarking activities.

5.2.1 Benchmarking

During the process of designing and developing an existing or new course, benchmarking activities will be carried out and documented in accordance with the Benchmarking Policy and associated procedure.

5.3 Course Structure

5.3.1 Course Duration

All award courses must have a course duration that meets the Australian Qualifications Framework (AQF) requirements.

5.3.2 Mode of Delivery

All award courses must have a course mode of delivery that meets the National Code of Practice for Providers of Education and Training to Overseas Students 2018.

5.3.3 Credit Points and Workload

All units at ASA must be assigned a fixed unit value and the same proportion of a full-time enrolment, regardless of the course in which students are offered. Units will normally be worth 10 credit points or a multiple of 10 credit points.

For a 10-credit point unit, students will be required to attend 4 hours of class work per week.

To facilitate AQF alignment, the correlation between unit levels and AQF levels (Table 1) enables clear demonstration that unit learning outcomes are the appropriate level and that the relationship between units and course learning outcomes are transparent.

Table 1 Correspondence between ASA Unit Levels and AQF Levels

ASA Unit Level	AQF Level	
100	Diploma	
200	Associate Degree	
300	Bachelor	
400	Graduate Certificate	
500	Graduate Diploma	
600	Master	

5.3.4 Course Pre-requisites and Co-requisites

When developing courses, as a matter of principle, pre-requisite units should be minimised and only introduced when crucial to increase flexibility in course progression. The use of corequisites may increase the flexibility of course progression.

5.3.5 Assessments

When developing assessments, there is a requirement for early assessment tasks with prompt feedback for introductory units to enable the early detection of students at risk. Refer to the Student Assessment Policy and related Procedure for further information on assessment requirements.

5.3.6 Work Integrated Learning

When developing courses which include a Work Integrated Learning unit, there are requirements that must be considered when designing this unit. Refer to the Work Integrated Learning Policy and related Procedure and Guidance Manual for further information.

5.3.7 Short Courses and Microcredentials

When developing courses or short courses, consideration should be given to:

i. how these microcredentials or short courses meet ASA's quality assurance framework,

- ii. how these microcredentials or short courses meet the Higher Education and Qualifications Standards,
- iii. the relevance to learners, to the labour market and to ASA.

Refer to the Short Courses and Microcredentials Policy and related Procedure for further information on short courses and microcredentials.

6. Relevant HESFs

This Policy and the associated Procedure comply with the Higher Education Standards Framework (Threshold Standards) 2021. The following are relevant excerpts and specify that:

Standard 1.4 Learning Outcomes and Assessment

- The expected learning outcomes for each course of study are specified, consistent with the level and field of education of the qualification awarded and informed by national and international comparators.
- 2. The specified learning outcomes for each course of study encompass discipline-related and generic outcomes, including:
 - a. specific knowledge and skills and their application that characterise the field(s) of education or disciplines involved,
 - b. generic skills and their application in the context of the field(s) of education or disciplines involved,
 - knowledge and skills required for employment and further study related to the course of study, including those required to be eligible to seek registration to practise where applicable, and
 - d. skills in independent and critical thinking suitable for life-long learning.
- 3. Methods of assessment are consistent with the learning outcomes being assessed, are capable of confirming that all specified learning outcomes are achieved and that grades awarded reflect the level of student attainment.
- 4. On completion of a course of study, students have demonstrated the learning outcomes specified for the course of study, whether assessed at unit level, course level, or in combination. [..]

Standard 3.1 Course Design

- 1. The design for each course of study is specified and the specification includes:
 - a. the qualification(s) to be awarded on completion
 - b. structure, duration and modes of delivery
 - c. the units of study (or equivalent) that comprise the course of study
 - d. entry requirements and pathways
 - e. expected learning outcomes, methods of assessment and indicative student workload
 - f. compulsory requirements for completion
 - g. exit pathways, articulation arrangements, pathways to further learning, and
 - h. for a course of study leading to a Bachelor Honours, Masters or Doctoral qualification, includes the proportion and nature of research or research-related study in the course.
- 2. The content and learning activities of each course of study engage with advanced knowledge and inquiry consistent with the level of study and the expected learning outcomes, including:
 - a. current knowledge and scholarship in relevant academic disciplines

- b. study of the underlying theoretical and conceptual frameworks of the academic disciplines or fields of education or research represented in the course, and
- c. emerging concepts that are informed by recent scholarship, current research findings and, where applicable, advances in practice.
- 3. Teaching and learning activities are arranged to foster progressive and coherent achievement of expected learning outcomes throughout each course of study.
- 4. Each course of study is designed to enable achievement of expected learning outcomes regardless of a student's place of study or the mode of delivery.
- 5. Where professional accreditation of a course of study is required for graduates to be eligible to practise, the course of study is accredited and continues to be accredited by the relevant professional body.

Standard 5.1 Course Approval and Accreditation

- 1. There are processes for internal approval of the delivery of a course of study, or, where a provider has authority to self-accredit, internal accreditation, of all courses of study leading to a higher education qualification.
- Course approval and self-accreditation processes are overseen by peak institutional
 academic governance processes, and they are applied consistently to all courses of study,
 before the courses are first offered and during re-approval or re-accreditation of the
 courses.
- 3. A course of study is approved or accredited, or re-approved or re-accredited, only when:
 - a. the course of study meets, and continues to meet, the applicable Standards of the *Higher Education Standards Framework*,
 - the decision to (re-)approve or (re-)accredit a course of study is informed by overarching academic scrutiny of the course of study that is competent to assess the design, delivery, and assessment of the course of study independently of the staff directly involved in those aspects of the course, and
 - c. the resources required to deliver the course as approved or accredited will be available when needed.

Standard 5.3 Monitoring, Review and Improvement

- 1. All accredited courses of study are subject to periodic (at least every seven years) comprehensive reviews that are overseen by peak academic governance processes and include external referencing or other benchmarking activities.
- 2. A comprehensive review includes the design and content of each course of study, the expected learning outcomes, the methods for assessment of those outcomes, the extent of students' achievement of learning outcomes, and also takes account of emerging developments in the field of education, modes of delivery, the changing needs of students and identified risks to the quality of the course of study.
- 3. Comprehensive reviews of courses of study are informed and supported by regular interim monitoring, of the quality of teaching and supervision of research students, student progress and the overall delivery of units within each course of study.
- 4. Review and improvement activities include regular external referencing of the success of student cohorts against comparable courses of study, including:
 - a. analyses of progression rates, attrition rates, completion times and rates and, where applicable, comparing different locations of delivery, and
 - b. the assessment methods and grading of students' achievement of learning outcomes for selected units of study within courses of study.
- 4. All students have opportunities to provide feedback on their educational experiences and student feedback informs institutional monitoring, review and improvement activities.
- 5. All teachers and supervisors have opportunities to review feedback on their teaching and

- research supervision and are supported in enhancing these activities.
- 5. The results of regular interim monitoring, comprehensive reviews, external referencing and student feedback are used to mitigate future risks to the quality of the education provided and to guide and evaluate improvements, including the use of data on student progress and success to inform admission criteria and approaches to course design, teaching, supervision, learning and academic support.

7. Version Control

This Policy has been reviewed and approved by the Australian School of Accounting Board of Directors as at December 2023 and is reviewed every three years.

This Policy, and associated procedure, is published and available on the Australian School of Accounting website https://www.asahe.edu.au/policies-and-forms/.
