7. Continuous Improvement

In order to ensure that the support services provided to students are accessible, consistent, and appropriate in scope and quality, services are subject to ongoing review. Feedback is regularly sought from various stakeholders across a range of areas and analysed with a view to identifying areas for improvement.

Student feedback is sought through a range of surveys, Student Representative Committee meetings, interviews and other means to ensure that students are represented appropriately, and their perspectives and needs centered in discussions regarding student support.

ASA uses the collected data to monitor trends and emerging issues, in particular against student needs and cohort characteristics. ASA benchmarks its performance against relevant comparator data and internal targets as set by the Board of Directors and Senior Management.

The Academic Board receives regular reports on the progress of student cohorts through the Teaching and Learning Committee and will make recommendations to the Board of Directors on any required adjustments to learning support services.

The Board of Directors receives an annual report on student support services that includes all internal data and the results of benchmarking.

Further information regarding continuous improvement measures is outlined in the *Quality Assurance Framework*.
